Max Extrusions Pvt. Ltd.

Excellence in packaging solutions

Daman, India

About Us

Max Extrusions Pvt. Ltd. is a Daman-based company that has set new standards in client satisfaction within the packaging and extrusion industries.

Over the past eight years, we have solidified our presence through a steadfast commitment to quality products and exceptional service.

Established
2007

Director
Mr. Deepak Mistry

Location
Daman & Diu, India

OUR MISSION

We are dedicated to delivering innovative solutions that meet the evolving needs of our diverse clientele.

Under the visionary leadership of our Director, we continuously strive for excellence and growth in every aspect of our operations.

19+

Years Experience

100%

Client Focus

Manufacturing

Advanced Infrastructure

Our operations are powered by a meticulously designed and spacious infrastructure facility. This modern setup is fully equipped with state-of-the-art apparatuses and cutting-edge machinery.

Industries We Serve

- 1) Retail & FMCG
- 2) Agriculture
- 3) Pharmaceuticals
- 4) Logistics
- 5) Hospitality
- 6) Manufacturing

Modern Equipment

- 1) Blown Film Extrusion
- 2) Flexographic Printing
- 3) Bottom Sealing Machines
- 4) Side Sealing Machines

Optimized Production

Our manufacturing facility is strategically divided into various specialized areas, supporting a smooth workflow from raw material processing to final product inspection.

COMMITMENT

We continuously invest in upgrading our technology and processes to stay at the forefront of the industry.

KEY OFFERINGS

- Unwavering Commitment to Quality
- Flexible Business Terms
- Competitive Pricing
- Exceptional Value & Service

As a responsible organization, **client satisfaction** is at the core of everything we do.

Owing to our ethical business approach and unwavering dedication to quality, we have built lasting partnerships with industry leaders.

Products We Serve

01

Ice Bags

Leak-proof ice bags made from high-quality, food-grade plastic for safe and hygienic storage. Strong, puncture-resistant, and built to withstand freezing temperatures, they prevent leaks and spills during transport. Ideal for supermarkets, restaurants, catering, and commercial use, these durable bags are easy to fill, stack, and carry, offering a reliable and cost-effective solution for secure ice packaging.

02

Garbage Bags

Tear-resistant garbage bags made from thick, premium-quality plastic for high load capacity and heavy-duty use. Designed to handle bulky, sharp, and industrial waste without tearing or leaking, they offer strong and secure waste containment.

Ideal for factories, warehouses, construction sites, and commercial spaces, these durable bags ensure safe handling, easy disposal, and long-lasting, cost-effective performance.

03

PVC Clear Bag

Tear-resistant garbage bags crafted from thick, high-quality plastic for superior strength and high load capacity. Built to handle bulky, sharp, and industrial waste without ripping or leaking, they provide secure and reliable containment. Suitable for factories, warehouses, construction sites, and commercial environments, these durable bags ensure safe disposal, easy handling, and cost-effective, long-lasting performance.

Products We Serve

04

Stretch Film

Flexible stretch films designed for secure pallet wrapping and reliable load protection during storage and transport. Made from high-quality, durable material, they offer excellent stretchability and strong cling to keep goods tightly bound and stable. With high tensile strength and puncture resistance, they are ideal for heavy or bulk loads in warehouses and logistics operations. Easy to apply by hand or machine, these films ensure safe, cost-effective, and efficient packaging performance.

05

Sliders bags

Safe and hygienic storage bags made from high-quality, food-grade materials to keep food fresh and protected. Designed to resist moisture, air, and contaminants, they help preserve taste, aroma, and quality for longer periods. Durable and leak-resistant, these bags are ideal for storing fruits, vegetables, grains, snacks, and prepared foods in homes or commercial settings. Easy to seal and handle, they provide a clean, convenient, and reliable solution for everyday food storage.

06

Pharmaceutical Packaging

Strong and transparent PVC film rolls made from high-quality material for reliable packaging and product protection. Offering excellent clarity and flexibility, they allow clear visibility while ensuring secure coverage. With high tensile strength and resistance to tearing or puncturing, these films are ideal for retail, industrial, and commercial use. Easy to apply and durable, they provide long-lasting protection against dust, moisture, and damage during handling and transport.

Products We Serve

07

Nursery Bags

Durable grow bags designed for nurseries and agricultural use, creating the ideal environment for healthy plant growth and strong root development. Made from breathable, UV-stabilized materials, they ensure proper aeration and drainage to prevent waterlogging. Strong enough to withstand outdoor conditions and rough handling, these lightweight bags are easy to move and manage. Suitable for vegetables, fruits, flowers, and saplings, they offer a reliable and practical solution for modern farming and gardening needs.

08

Oxo-biodegradable products

Biodegradable carry bags made from sustainable, eco-friendly materials offer a responsible alternative to traditional plastic bags. Strong and durable, they can easily carry groceries, retail items, and daily essentials without tearing. Designed for reuse, they help reduce waste while maintaining reliable performance. Naturally decomposable under proper conditions, these bags support environmentally conscious practices and provide a practical, green packaging solution for businesses and consumers.

09

Agricultural Mulch Film

Weather-resistant mulch films made from high-quality, UV-stabilized materials provide reliable crop protection in various climates. Designed to withstand sunlight, rain, and temperature changes, they help retain soil moisture and regulate temperature throughout the growing season. By reducing water evaporation and suppressing weed growth, these films promote healthier roots and improved crop yield. Suitable for vegetables, fruits, and plantation crops, they offer an efficient and dependable solution for modern farming.

Products We Serve

10

Plastic Carry Bags

Plastic carry bags designed for convenient and reliable everyday use. Made from durable, high-quality plastic, these bags offer strong load capacity and resistance to tearing, making them suitable for carrying groceries, retail products, and general merchandise. Lightweight and easy to handle, they provide practical packaging solutions for shops, supermarkets, and commercial businesses. Available in various sizes and thickness options, plastic carry bags ensure efficient storage, easy transportation, and cost-effective performance for daily needs.

11

Plastic Film

Plastic film designed for versatile packaging and protective applications across commercial and industrial sectors. Manufactured from high-quality materials, it offers excellent flexibility, strength, and clarity to ensure secure wrapping and reliable coverage. Resistant to moisture, dust, and external damage, plastic film helps maintain product safety during storage and transportation. Easy to handle and apply, it provides a cost-effective and efficient solution for packaging, surface protection, and general wrapping needs.

12

Lamination Film Rolls

Lamination film rolls designed to provide durable surface protection and a smooth, professional finish for various applications. Made from high-quality materials, these films offer excellent clarity, strong adhesion, and resistance to scratches, moisture, and wear. Ideal for enhancing printed materials, packaging, labels, and decorative surfaces, they help preserve color vibrancy and extend product life. Easy to apply and long-lasting in performance, lamination film rolls deliver reliable protection and premium finishing for commercial and industrial use.

Products We Serve

13

Poly-olefin Shrink Film

Polyolefin shrink film rolls designed for secure, professional-grade packaging and product protection. Made from high-quality polyolefin material, these films offer excellent clarity, strong sealing performance, and smooth shrinkage for a tight, wrinkle-free finish. They provide high puncture resistance and durability, ensuring reliable protection against dust, moisture, and handling damage. Suitable for food, retail, and industrial packaging, polyolefin shrink film delivers safe, efficient, and cost-effective wrapping with a clean, attractive presentation.

14

LD Shrink Film

LD shrink film designed for strong, flexible, and reliable packaging applications. Made from high-quality low-density material, it offers excellent shrink performance, durability, and resistance to tearing or puncturing. Ideal for bundling, wrapping, and protecting products during storage and transportation, this film provides secure coverage against dust, moisture, and external damage. Easy to apply and cost-effective, LD shrink film ensures stable packaging with a clean and professional finish for industrial and commercial use.

15

Surface Protection Film

Surface protection film designed to safeguard surfaces from scratches, dust, moisture, and damage during manufacturing, storage, and transportation. Made from high-quality, durable material, it provides strong adhesion while allowing easy removal without leaving residue. Suitable for glass, metal, plastic, aluminum, and painted surfaces, this film ensures reliable temporary protection and maintains product appearance. Easy to apply and cost-effective, surface protection film delivers secure coverage and dependable performance across industrial and commercial applications.

Products We Serve

16

Lamination Pouches

Lamination pouches designed to provide strong protection and a clear, professional finish for documents, photos, certificates, and ID cards. Made from high-quality materials, these pouches offer excellent clarity, durability, and resistance to moisture, dust, and wear. They ensure secure sealing when used with laminating machines, preserving color vibrancy and extending the life of important materials. Easy to use and available in various sizes and thicknesses, lamination pouches deliver reliable performance for office, educational, and commercial applications.

17

Frosted Films / Bags

Frosted films and bags designed to provide a stylish, semi-transparent finish with reliable protection and durability. Made from high-quality materials, they offer a smooth matte appearance that enhances product presentation while maintaining privacy and visibility control. Resistant to moisture, dust, and tearing, these films and bags are suitable for packaging, retail, gifting, and promotional use. Strong yet lightweight, they ensure easy handling and secure storage, delivering both aesthetic appeal and dependable performance for commercial applications.

18

Conducting Plastic Sheets

Conductive plastic sheets designed to safely dissipate static electricity and protect sensitive electronic components. Manufactured from high-quality conductive materials, these sheets help prevent electrostatic discharge (ESD) damage during handling, storage, and transportation. Durable, flexible, and resistant to wear, they are ideal for use in electronics manufacturing, packaging, cleanrooms, and industrial environments. Easy to cut and apply, conducting plastic sheets provide reliable performance and secure protection for static-sensitive products.

Products We Serve

19

Blue Non-Perforated Release Film

Blue non-perforated release film designed for smooth and reliable separation in industrial and manufacturing applications. Made from high-quality material, it provides a consistent, non-stick surface that ensures clean release without tearing or residue. The non-perforated structure offers uniform coverage and enhanced durability, making it suitable for laminating, composite processing, and protective layering. Strong, flexible, and easy to handle, this release film delivers dependable performance and efficient application in demanding production environments.

20

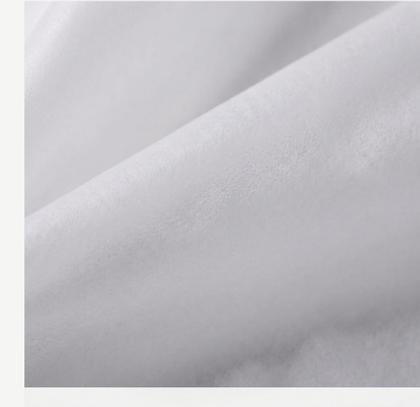

Compostable Garbage Bags

Compostable garbage bags made from eco-friendly, biodegradable materials for responsible waste disposal. Designed to break down naturally under composting conditions, they help reduce environmental impact while maintaining strength and reliability. These durable bags can handle everyday household or light commercial waste without tearing or leaking. Ideal for kitchens, offices, and organic waste collection, compostable garbage bags provide a sustainable and practical solution for cleaner and greener waste management.

21

Breathable Films

Breathable films designed to allow controlled air and moisture permeability while maintaining strong protection and durability. Made from high-quality materials, these films help regulate airflow and prevent condensation, making them ideal for hygiene products, agricultural applications, and specialized packaging. Their flexible and lightweight structure ensures easy handling and reliable performance in various environments. Combining strength, functionality, and efficiency, breathable films provide an effective solution for applications requiring ventilation and moisture control.

Products We Serve

22

Courier Bags

Courier bags designed for secure and reliable shipping of documents, parcels, and e-commerce packages. Made from strong, tear-resistant material, they provide excellent protection against moisture, dust, and tampering during transit. Featuring durable sealing for safe closure, these bags ensure that contents remain secure throughout handling and delivery. Lightweight yet sturdy, courier bags offer a cost-effective and efficient packaging solution for logistics, online businesses, and commercial shipping needs.

23

Transparent Plastic Sheets

Transparent plastic sheets designed for versatile protection and clear visibility across various applications. Made from high-quality materials, they offer excellent clarity, durability, and resistance to moisture, dust, and impact. Ideal for packaging, surface covering, partitions, and industrial use, these sheets provide reliable performance while maintaining a clean and professional appearance. Easy to cut, shape, and install, transparent plastic sheets deliver a practical and cost-effective solution for commercial and general-purpose needs.

24

Non-Laminated Woven Bags

Non-laminated woven bags designed for strong, breathable, and durable packaging solutions. Made from high-quality woven fabric, these bags offer excellent load capacity and tear resistance, making them suitable for storing and transporting grains, fertilizers, seeds, cement, and other bulk materials. Their breathable structure allows proper air circulation, helping to maintain product quality. Lightweight yet sturdy, non-laminated woven bags provide a cost-effective and reliable option for agricultural, industrial, and commercial applications.

Products We Serve

25

Laminated Woven Bags

Laminated woven bags designed for enhanced strength, durability, and moisture resistance in bulk packaging applications. Made from high-quality woven fabric with an added laminated layer, these bags provide superior protection against water, dust, and external damage. Ideal for packing grains, fertilizers, chemicals, cement, and other industrial products, they ensure safe storage and secure transportation. Strong, tear-resistant, and long-lasting, laminated woven bags offer a reliable and cost-effective solution for agricultural, industrial, and commercial use.

26

Bubble Film

Bubble film designed for superior cushioning and reliable protection during packaging and transportation. Made from high-quality, flexible material with air-filled bubbles, it effectively absorbs shock and prevents damage from impact, vibration, and handling. Lightweight yet durable, bubble film protects fragile items such as glassware, electronics, ceramics, and other delicate products. Easy to wrap and cut, it offers a cost-effective and dependable solution for safe storage, shipping, and surface protection across commercial and industrial applications.

27

BOPP Bags

BOPP bags designed for strong, attractive, and durable packaging solutions. Made from high-quality BOPP (Biaxially Oriented Polypropylene) material, these bags offer excellent clarity, strength, and moisture resistance to protect products during storage and transport. Ideal for packaging food grains, snacks, fertilizers, and consumer goods, they provide vibrant print quality and a premium appearance. Tear-resistant and long-lasting, BOPP bags ensure secure packaging and reliable performance for commercial and industrial applications.

Products We Serve

28

Mulching Film

Mulching film designed to enhance crop growth and improve agricultural productivity. Made from high-quality, durable material, it helps retain soil moisture, regulate temperature, and reduce water evaporation. By creating a protective barrier over the soil, it effectively controls weed growth and minimizes soil erosion. Suitable for vegetables, fruits, and plantation crops, mulching film provides a reliable and cost-effective solution for modern farming practices.

29

PVC Shrink Film

PVC shrink film designed for secure and professional packaging applications. Made from high-quality PVC material, it offers excellent clarity, strong shrink performance, and a smooth finish for tight and attractive wrapping. Ideal for bundling and protecting products such as bottles, boxes, and consumer goods, it provides resistance against dust, moisture, and handling damage. Easy to apply and cost-effective, PVC shrink film ensures reliable sealing and enhanced product presentation for retail and industrial use.

30

Non-Laminated Woven Bags

Non-laminated woven bags designed for strong, breathable, and reliable bulk packaging. Made from high-quality woven material, these bags offer excellent load capacity and tear resistance, making them ideal for storing and transporting grains, seeds, fertilizers, cement, and other agricultural or industrial products. Their breathable structure allows proper air circulation to help maintain product quality. Lightweight yet durable, non-laminated woven bags provide a cost-effective and dependable solution for commercial and farming applications.

Sustainable Solutions

OUR COMMITMENT

We are dedicated to offering environmentally conscious solutions, including OXO Biodegradable Products, minimizing environmental impact without compromising performance.

Understanding Oxo-Biodegradable Plastic

Composition

Petroleum-based plastic blended with small amounts of metal salts.

Accelerated Fragmentation

Metals act as catalysts, significantly speeding up fragmentation when exposed to oxygen and heat.

Reduced Lifespan

Shortens degradation time from hundreds of years to months or a few years.
